

ANDRZEJ KRASIŃSKI
CHRONOLOGICAL LIST OF MAIN PAPERS

(Note: The list includes research and review papers and technical reports;
also those few that did not make it through refereeing
or were not submitted for publication;
it does not include popular articles and short notes)

1. Solutions of the Einstein field equations for a rotating perfect fluid, Part 1 - Presentation of the flow-stationary and vortex- homogeneous solutions. *Acta Phys. Polon.* **B5**, 411 (1974).
2. Solutions of the Einstein field equations for a rotating perfect fluid, Part 2 - Properties of the flow-stationary and vortex- homogeneous solutions. *Acta Phys. Polon.* **B6**, 223 (1975).
3. Solutions of the Einstein field equations for a rotating perfect fluid, part 3 - A survey of models of a rotating perfect fluid or dust. *Acta Phys. Polon.* **B6**, 239 (1975), also published in a largely expanded form as a preprint.
4. Some solutions of the Einstein field equations for a rotating perfect fluid distribution. *J. Math. Phys.* **16**, 125 (1975).
5. Models of the Universe in general relativity (in Polish). *Postępy Astronomii* **23**, 97 (1975).
6. Is the Sun spherical? (in Polish). *Postępy Astronomii* **23**, 159 (1975).
7. A class of rotating and expanding Universes. In: *8th International Conference on General Relativity and Gravitation*. University of Waterloo 1977, p. 216.
8. Ellipsoidal spacetimes. In: *8th International Conference on General Relativity and Gravitation*. University of Waterloo 1977, p. 217.
9. A. Krasiński, Marek Perkowski, Symbolic algebraic computer programs, Part 1 - The LISP programming language (in Polish). *Postępy Astronomii* **25**, 203 (1977).
10. A. Krasiński, Marek Perkowski, Symbolic algebraic computer programs, Part 2 - Applications and perspectives (in Polish). *Postępy Astronomii* **26**, 33 (1978).
11. A survey of cosmological models. *Acta Cosmologica* **7**, 101 (1978).
12. Rotational motion of matter in general relativity. *Acta Cosmologica* **7**, 119 (1978).
13. Cylindrical rotating Universe. *Acta Cosmologica* **7**, 133 (1978).
14. All flow-stationary cylindrically symmetric solutions of the Einstein field equations for a rotating isentropic perfect fluid. *Rep. Math. Phys.* **14**, 225 (1978).
15. Ellipsoidal spacetimes, sources for the Kerr metric. *Ann. Phys.* **112**, 22 (1978).
16. A. Krasiński, Marek Perkowski, Zdzisław Otwinowski, The system ORTO-CARTAN for analytic calculations. Detailed description. Preprint (1979), documentation to the program.

17. A. Krasiński, Marek Perkowski, The system ORTOCARTAN - user's manual. Preprint (1980), documentation to the program.
18. A. Krasiński, Jerzy Plebański, N-dimensional complex Riemann-Einstein spaces with $O(n-1, C)$ as the symmetry group. *Rep. Math. Phys.* **17**, 217 (1980).
19. A. Krasiński, Marek Perkowski, ORTOCARTAN - a computer program for calculating curvature tensors. In: *9th International Conference on General Relativity and Gravitation*. University of Jena 1980, p. 106.
20. Spacetimes with intrinsic spherical symmetry. In: *9th International Conference on General Relativity and Gravitation*. University of Jena 1980, p. 44.
21. A Newtonian model of the Kerr gravitational field. In: *9th International Conference on General Relativity and Gravitation*. University of Jena 1980, 46.
22. A Newtonian model of the source of the Kerr metric. *Phys. Lett.* **A80**, 238 (1980).
23. Figures of equilibrium, Part 1 - Basic theorems (in Polish). *Postępy Astronomii* **28**, 271 (1980).
24. A. Krasiński, Marek Perkowski, ORTOCARTAN - a new computer program for analytic calculations in general relativity. *Gen. Relativ. Gravit.* **13**, 67 (1981).
25. A. Krasiński, Marek Perkowski, ORTOCARTAN - a new computer program for algebraic calculations. *Computer Phys. Commun.* **22**, 269 (1981).
26. The Universe that can open up or close. Paper awarded the "honorable mention" award in the 1981 Gravity Research Foundation Competition. Never submitted for publication.
27. Spacetimes with spherically symmetric hypersurfaces. *Gen. Relativ. Gravit.* **13**, 1021 (1981).
28. Figures of equilibrium, Part 2 - Homogeneous figures (in Polish). *Postępy Astronomii* **29**, 31 (1981).
29. Figures of equilibrium, Part 3 - Inhomogeneous figures (in Polish). *Postępy Astronomii* **29**, 87 (1981).
30. The Universe with time-varying spatial curvature index. In: *The birth of the Universe*. Edited by J. Audouze and J. Tran Tranh Van. Proceedings of the 17-th Rencontre de Moriond 1982, vol. 34. Editions Frontieres, Gif sur Yvette 1982, p. 15.
31. On the global geometry of the Stephani Universe. *Gen. Relativ. Gravit.* **15**, 673 (1983).
32. Symmetries of the Riemann tensor. In: *10th International Conference on General Relativity and Gravitation*. University of Padua 1983, p. 290.
33. The program ORTOCARTAN for algebraic calculations - new developments. In: *10th International Conference on General Relativity and Gravitation*. University of Padua 1983, p. 433.
34. The Universe with varying topology of spatial slices. In: *10th International Conference on General Relativity and Gravitation*. University of Padua 1983,

p. 841.

35. A. Krasiński, Marek Perkowski, The system ORTOCARTAN - user's manual. Third edition, Cologne 1983. Updated documentation to the program, stored and distributed on a magnetic tape.
36. ORTOCARTAN - a program for algebraic calculations in general relativity. *SIGSAM Bulletin* **17** no 3 – 4, 12 (1983).
37. A. Krasiński, Marek Perkowski, Zdzisław Otwinowski and Marek Kwaśniewski, The system ORTOCARTAN for analytic calculations. Detailed description. Second edition, Warsaw 1984. Updated documentation to the program, stored and distributed on a magnetic tape.
38. A generalization of the Lemaître models. In: *The Big Bang and Georges Lemaître*. Edited by A. Berger. D. Reidel Publishing Company, Dordrecht 1984, p. 63.
39. The system ORTOCARTAN - user's manual. Supplement to the second edition. Preprint (1984), documentation to the program, included in the updates of the magnetic tape version of no 35.
40. Generalized cosmological models. In: *Proceedings of the Sir Arthur Eddington Centenary Symposium, Vol. I: Relativistic astrophysics and cosmology*. Edited by V. de Sabbata and T. M. Karade. World Scientific Publishing Company, Singapore 1984, p. 45.
41. The program ORTOCARTAN for applications in Einstein's relativity theory. In: *EUROCAL'85, European Conference on Computer Algebra, Linz, Austria, 1985. Proceedings, vol. 2: Research contributions*. Edited by B. F. Caviness. Lecture Notes in Computer Science vol. 204. Springer, Berlin 1985, p. 159.
42. A. Krasiński, Stanisław Bażański and Renata Kaczyńska, Physical properties of the extended Chasles equilibrium figure. *Phys. Lett. A* **115**, 33 (1986).
43. The program ORTOCARTAN - developments since 1983. In: *11th International Conference on General Relativity and Gravitation*. University of Stockholm 1986, p. 58.
44. Spacetimes with conformally flat flow-orthogonal sections. In: *11th International Conference on General Relativity and Gravitation*. University of Stockholm 1986, p. 327.
45. A spatially periodic generalization of the FLRW cosmological models. In: *Proceedings of the 4th Marcel Grossman Meeting on General Relativity*. Edited by R. Ruffini. Elsevier Science Publishers B. V., Amsterdam 1986, p. 989.
46. Inhomogeneous generalizations of the Robertson-Walker cosmological models. In: *Gravitational Collapse and Relativity, Proceedings of Yamada Conference XIV*. Edited by H. Sato and T. Nakamura. World Scientific Publishing Company, Singapore 1986, p. 500.
47. The program ORTOCARTAN for applications in the relativity theory. In: *International Conference on Computer Algebra and its Applications in Theoretical Physics*. Edited by N. N. Govorun. Joint Institute for Nuclear Research,

Dubna 1986, p. 50.

48. On the equations of state and on flow of perfect fluids in general relativity (comments to two papers by V. I. Obozov). *Acta Phys. Polon.* **B19**, 801 (1988).
49. Shearfree normal cosmological models. *J. Math. Phys.* **30**, 433 (1989).
50. Symmetries of manifolds and tensor fields and the Bianchi classification. In: *Proceedings of the Instructional Workshop on Advanced Aspects of General Relativity, vol. I*. Edited by A. Banerjee. Jadavpur University and the Indian Association for the Cultivation of Science, Calcutta 1989, p. 6.
51. A unified representation of the shearfree normal models. In: *12th International Conference on General Relativity and Gravitation*. University of Colorado at Boulder 1989, p. 341.
52. Cosmological exact solutions. In: *12th International Conference on General Relativity and Gravitation*. University of Colorado at Boulder 1989, p. 340.
53. Early inhomogeneous cosmological models in Einstein's theory. In: *Modern Cosmology in Retrospect*. Edited by B. Bertotti, R. Balbinot, S. Bergia and A. Messina. Cambridge University Press, Cambridge 1990, p. 115.
54. User-friendly features of ORTOCARTAN. In: *Computer Algebra in Physical Research*. Edited by D. V. Shirkov, V. A. Rostovtsev and V. P. Gerdt. World Scientific, Singapore 1991, p. 66.
55. A note on the uniqueness of the Wyman solution. *Rep. Math. Phys.*, **29**, 337 (1991).
56. The program ORTOCARTAN - now available on Atari. In: *13th International Conference on General Relativity and Gravitation*. University of Cordoba 1992, p. 305.
57. Cosmology in an inhomogeneous Universe. In: *13th International Conference on General Relativity and Gravitation*. University of Cordoba 1992, p. 378.
58. A survey of cosmological exact solutions. In: *Proceedings of the 6th Marcel Grossman Meeting on General Relativity*. Edited by H. Sato and T. Nakamura. World Scientific, Singapore 1992, p. 642.
59. Physics in an inhomogeneous Universe (in Polish). *Postępy Fizyki* **43**, 415 (1992).
60. The program ORTOCARTAN for algebraic calculations in relativity. *Gen. Relativ. Gravit.* **25**, 165 (1993).
61. The Galileo affair (in Polish). *Postępy Fizyki* **44**, 487 (1993); same text: *Postępy Astronomii* **41**, 109 (1993) - part 1, **41**, 183 (1993) - part 2.
62. Bibliography on inhomogeneous cosmological models. *Acta Cosmologica* **20**, 67 (1994).
63. Physics in an inhomogeneous Universe [a different text from no 59]. In: *Inhomogeneous cosmological models. Proceedings of the 1994 Spanish Relativity Meeting*. Edited by J. M. M. Senovilla and A. Molina. World Scientific, Singapore, 1995, p. 27.

64. Overview of inhomogeneous cosmological models. In: *Recent developments in gravitation and mathematical physics*. Edited by A. Macias, T. Matos, O. Obregon and H. Quevedo. World Scientific, Singapore 1996, p. 163.
65. Inhomogeneous cosmological models [a book]. Cambridge University Press, Cambridge 1997, 317 pp, ISBN 0 521 48180 5. Paperback re-edition 2006; electronic re-edition 2010.
66. A. Krasiński, Hernando Quevedo and Roberto Sussman, On the thermodynamical interpretation of perfect fluid solutions of the Einstein equations with no symmetry. *J. Math. Phys.* **38**, 2602 (1997).
67. Rotating dust solutions of Einstein's equations with 3-dimensional symmetry groups; Part 1: Two Killing fields spanned on u^α and w^α . *J. Math. Phys.* **39**, 380 (1998).
68. Rotating dust solutions of Einstein's equations with 3-dimensional symmetry groups; Part 2: One Killing field spanned on u^α and w^α . *J. Math. Phys.* **39**, 401 (1998).
69. Rotating dust solutions of Einstein's equations with 3-dimensional symmetry groups; Part 3: All Killing fields linearly independent of u^α and w^α . *J. Math. Phys.* **39**, 2148 (1998).
70. Physics and cosmology in an inhomogeneous Universe. In: *Black holes and high energy astrophysics. Proceedings of the 49th Yamada Conference*. Edited by H. Sato and N. Sugiyama. Universal Academy Press, Tokyo 1998, p. 133.
71. The ultimate extension of the Bianchi classification for rotating dust models. In: *On Einstein's path: Essays in honor of Engelbert Schucking*. Edited by A. Harvey. Springer, New York 1999, p. 283.
72. What is space and what space do we live in? (the point of view of a nonquantum physicist) (in Polish). In: *Space in Contemporary Science*. Edited by S. Symotiu and G. Nowak. Publishing House of the Maria Curie-Skłodowska University, Lublin 2000, p. 11.
73. The newest release of the Ortocartan set of programs for algebraic calculations in relativity. *Gen. Relativ. Gravit.* **33**, 145 (2001).
74. Rotating Bianchi type V dust models generalizing the $k = -1$ Friedmann models. *J. Math. Phys.* **42**, 355 (2001).
75. [As a member of a large team], Dictionary of Geophysics, Astrophysics and Astronomy. Edited by R. Matzner. CRC Press, Boca Raton, London, New York and Washington 2001. [68 definitions contributed, total number of contributors: 51].
76. Friedmann limits of hypersurface-homogeneous rotating dust models. *J. Math. Phys.* **42**, 3628 (2001).
77. Rotating dust models in relativity. In: *Coherent states, quantization and gravity. Proceedings of the XVIIth Workshop on Geometric Methods in Physics, Bialowieża (Poland) 1998*. Edited by M. Schlichenmaier, A. Strasburger, S. Twareque Ali and A. Odzijewicz. Warsaw University Press, Warsaw 2001,

p. 199.
